# press information

## **AQUAFIL ENGINEERING GmbH further strengthen its technology and service base**

Mr. Jürgen Krautstrunk formerly technology head for Polyester at Zimmer for almost 3 decades and thereafter plant manager and head of technology with production experience for 7 years at Trevira Germany, has now joined Aquafil Engineering in Berlin. He brings into Aquafil his knowledge and expertise in process development and technology and will further assist Aquafil's customers in optimizing operation, lowering production cost and improve their market presence.

Mr. Krautstrunk will work closely with Mr. Wolf Karasiak, who is inventor of the famous disc ring cage reactor and also the Aquafil 2-reactor process, giving additional push to the technological developments in Aquafil Engineering GmbH.
